INTERNATIONAL TRANSPORT INTERMEDIARIES CLUB LIMITED

Notice of Meeting

Notice is hereby given that the 34th Annual General Meeting of the members of International Transport Intermediaries Club Limited ("ITIC") will be held at Vogue Hotel, Montreal, Canada at 12.45 p.m. on Thursday, 24 September 2026 for the following purposes:

o To receive the Strategic and Directors' Report with Financial Statements for the year ended 31 May 2026 and, if they are approved, to adopt them.

o To elect directors.

o To confirm the appointment of Auditors and to authorise the directors to agree their remuneration.

o To transact any other business of an Annual General Meeting.

By order of the board

K Halpenny
Secretary

27 July 2026

Notes:

i) A member entitled to attend and vote at the above meeting is entitled to appoint one or more proxies to attend and vote instead of him or her. A person so appointed must be a member of ITIC. The instrument appointing a proxy must be deposited with the Secretary not less than forty-eight hours before the meeting.

ii) The agenda papers for the Annual General Meeting setting out the resolutions and containing the minutes of the last Annual General Meeting are made available to members prior to the meeting via ITIC's website.

INTERNATIONAL TRANSPORT INTERMEDIARIES CLUB LIMITED

Group Strategic Report

The directors present their Group Strategic Report on ITIC for the year ended 31 May 2026.

Principal Activities

The principal activity of ITIC, and its subsidiary, International Transport Intermediaries Insurance Company (Europe) Ltd ("ITIC Europe"), together "the group", during the year was the insurance of professional indemnity and public liability risks of professionals in the transport industry.

Strategic Direction

The objective of the group is to provide competitively priced professional indemnity insurance (and related products) with loss prevention advice to businesses (known as members) servicing the marine and transport industry through a mutual insurance company, which maintains strong reserves and which is supported by at least “A-” rated reinsurance security for limits in excess of the retention, sound risk management, quality service and competent staff.

Business Review

The board considers that the key indicators that will communicate the financial performance and strength of the group to its members are: gross earned premium, combined ratio, being total underwriting costs and general expenses as a percentage of gross earned premium; and operating surplus before investment result and taxation.

The board also uses a number of other key performance indicators, key risk indicators and key control indicators to assess the performance of individual parts of the business.

The gross earned premium drives the scale of the business. Action is taken continuously to ensure that business is written at rates required to achieve the target return. Joining and leaving members are continuously monitored. The continuity credit for renewing members is a mechanism for distributing excess reserves or retaining reserves where appropriate.

The combined ratio, together with various cost ratios, monitors the performance of the group from a number of perspectives.

The operating surplus before continuity credit and taxation is the key performance measure. The group aims to deliver sustainable surpluses over the insurance cycle by choosing and underwriting risks at appropriate rates, coupled with rigorous expense control and the delivery of superior customer service to its members and intermediaries.

The following table extracts the main headings that management use to monitor the business performance. The directors find it useful to show the results at a summary level and to show the results before and after the cost of the quota share reinsurance arrangement. The surplus reconciles to the surplus on the technical account in the consolidated statement of income and expenditure account and all line items reconcile directly back to those included within the consolidated income and expenditure account and accompanying notes.

As illustrated below, premium increased by 3.8% (2025: 6.3%) coming from a net increase in members and strong renewals. Excess of loss reinsurance costs reduced slightly benefiting from a strong renewal and two-year policies. Net claims costs increased following strengthening of claims reserves to reflect a pattern of later than expected deterioration of earlier years. Management fees increased to reflect new resource taken on. Other expenses remained high as the group took advice on how to react to the proposed merger of the UK P&I Club and the TT Club. Noting the ongoing strong performance, the board decided to maintain the level of continuity credit for 2026/27 at 35% - 45%. The combined loss ratio before continuity credit and quota share reinsurance for the financial year was 77.8% compared with the prior year's 72.3%.

The investment return for the year was strong for the second year in a row.

	Notes	2026 US$ 000s	2026 % of gross earned premium	2025 US$ 000s	2025 % of gross earned premium
Gross earned premium	5	79,358	100.0%	76,427	100.0%
Less acquisition costs including management fee element	8	(12,646)	15.9%	(12,367)	16.2%
Less excess of loss reinsurance costs	6	(5,271)	6.6%	(5,524)	7.2%
Net retained premium		61,441	77.4%	58,536	76.6%
Claims incurred net of excess of loss recoveries including management fee element	7	(30,404)	38.3%	(26,902)	35.2%
Management Fee (excluding acquisition and claims elements)	9	(9,115)	11.5%	(7,597)	9.9%
Other expenses	8	(4,283)	5.4%	(2,898)	3.8%
Total claims and other expenses		(43,802)	55.2%	(37,397)	48.9%
Total costs (excluding continuity credit)		*(61,719)*	*77.8%*	*(55,288)*	*72.3%*
Operating surplus before continuity credit and quota share reinsurance		17,639	22.2%	21,139	27.7%
Less continuity credit	5	(28,278)	35.6%	(18,769)	24.6%
Net (cost) / benefit of quota share reinsurance	see below *	12,110	-15.3%	(1,122)	1.5%
Surplus / (deficit) on technical account before investment result		1,471	1.9%	1,248	1.6%
Investment return	14	4,703		3,353	
Exchange result	15	621		1,318	
Surplus before tax		6,795		5,919	
The net result from the quota share reinsurance is made up as follows:					
Outward quota share reinsurance on premium	6	(71,423)		(68,785)	
Add back quota share reinsurance on continuity credit	6	25,451		16,892	
Add back quota share acquisition costs (note 10)	6	8,342		8,578	
Add back quota share reinsurance - excess of loss	6	4,744		4,971	
Add back quota share recoveries	7	24,578		21,880	
		(8,308)		(16,464)	
Plus ceding commission from TIMIA	6	20,418		15,342	
Net (cost) / benefit of quota share reinsurance		12,110		(1,122)	

Group Strategic Report (continued)

The balance sheet shows US$65,675,000 (2025: US$59,995,000) as retained reserves.

Investments

The total deposited at banks and invested in bonds and other fixed interest securities amounted to US$58,224,000 (2025: US$63,752,000). This produced a positive return of US$4,703,000 (2025: positive US$3,353,000).

The group has retained its strong capital position and its retained reserves at 31 May 2026 is comfortably above the Prudential Regulation Authority's minimum capital requirements (last year's unaudited return showed 748% coverage), the Standard Formula Solvency Capital Requirement (last year's unaudited return showed 498% coverage) and the Own Risk and Solvency Assessment's capital requirement.

Reinsurance

The group places two main types of reinsurance.

- The group's excess of loss reinsurance cost includes the cost of the underlying contract and the cost of the reinsurance in respect of limits of cover in excess of those provided by ITIC. This cost for the year was US$5,271,000 (2025 - US$5,524,000).

- The group also has quota share reinsurance through Transport Intermediaries Mutual Insurance Association Ltd. The aggregate of claims within ITIC's retention is reinsured on a 90% quota share basis by Transport Intermediaries Mutual Insurance Association Ltd of Hamilton, Bermuda.

The quota share policy cost US$8,308,000 (2025 - US$16,464,000) less a ceding commission of US$20,418,000 (2025 - $15,342,000). See the Business Review above for a breakdown.

Analysis of Funds in 2024/25 (Closed) and 2025/26 (Open) Policy Years and Reserves as at 31 May 2026

The following table shows the accumulated group surplus split down by the group policy year. This is different to the breakdown by the group financial year as shown in the consolidated income and expenditure account.

	At 31 May 2026	Change in year	At 31 May 2025
	US$ 000s	US$ 000s	US$ 000s
General reserves and earlier years (all closed)	54,708	(165)	54,873
2024/25 policy year (closed March 2026)	5,368	246	5,122
2025/26 policy year (open)	5,599	5,599	-
General reserves at end of year	65,675	5,680	59,995

The results above are stated after:

1. Quota share costs comprising 90% of: premium, net of brokerage, commissions, excess of loss reinsurance premiums and claims net of reinsurance recoveries.

2. The ceding commission received from the quota share reinsurer covering the management fee, general expenses and exchange gains and losses of the group.

At their meeting in March 2026, the directors decided to close ITIC's 2024/25 policy year leaving only the 2025/26 policy year open.

Companies Act Section 172(1)

The likely consequences of any long term decisions

The ITIC board considers the group's future operations and strategy at board meetings and at less formal strategy days. Decisions impacting the future of the group are carefully considered and, if appropriate, approved by the board.

The interests of the group's employees

The group has no employees. It has outsourced its day to day operation to International Transport Intermediaries Management Company Limited ("ITIM"), a company owned by Thomas Miller Holdings Limited. The board of ITIC have appointed two of ITIM's directors to the main board.

The need to foster the group's business relationships with suppliers, customers and others.

In terms of the wider community impacted by the group, as a mutual insurer, ITIC exists for the benefit of its members, who are also insureds of ITIC. To this end ITIC's board aims to provide a high quality service for a competitive price. From 1992, ITIC's success has enabled it to distribute excess funds back to members by way of continuity credits for renewing members. This is also the case for ITIC Europe, the subsidiary of ITIC, which is not a mutual company.

The group outsources management of the day-to-day operations to ITIM. In this regard, the board ensures that any business conducted with ITIM is done so on appropriate terms.

Through its managers, the group maintains contact and high level engagement with the management of its key brokers and reinsurers. The boards receive periodic updates on the group's key broker and reinsurer relationships.

Group Strategic Report (continued)

The impact of ITIC's operations on the community and the environment.

As a service orientated organisation, the group does not consider itself to have a material impact on the environment. The board has established a policy on climate change which is owned by the group's Chief Underwriting Officer and Chief Financial Officer and this considers the risk of climate change associated with the group.

The group considers the best interests of its members and insureds as a priority. This includes returning excess funds to its members by way of continuity credits, and acting as a sounding board for industry issues by participating and presenting in conferences on the benefits of having the appropriate professional indemnity insurance cover.

The desirability of the group maintaining a reputation for high standards of business conduct.

The board has in place a conduct risk policy that applies to both the board and the managers and ensures that the group acts appropriately for its insureds whilst keeping them, and the integrity of the markets in which they operate, central to all the group's activities.

The need to act fairly between members of the group.

The conduct risk policy as referred to above, ensures that customers are treated fairly. In addition the board have established a conflicts of interest policy which ensures that any conflict of interest around member issues are appropriately disclosed and dealt with at board level.

Decisions in the year.

During the year, the board made a number of decisions. These include decisions on the renewal proposal to members, the reinsurance program and the level of continuity credit. Further decisions are made in respect of other matters discussed at board meetings as shown in "Meetings of Directors" in the directors' report.

The directors therefore consider that the requirements of Section 172(1) are appropriately addressed within the group's policies and procedures.

Future Development

At its board meetings, the directors consider future developments. They expect that the coming year will show an increase in premium, potentially some additional claims and a continuing volatile investment market. It is expected that the group will maintain a sustainable level of business activity for the foreseeable future.

Membership

As at 31 May 2026, the members' main activities and the percentage of premium were as follows. Some members carry on more than one of these activities and many members are insured jointly with their subsidiary or related companies. The membership is drawn from 132 countries with a substantial number of members from UK, EU states, North America, Australasia, the Far East and the Middle East.

Other marine activities	26%
Ship broker	18%
Ship manager	17%
Port agency	13%
Liner agency	9%
Naval architect	6%
Aviation	6%
Marine surveyor	5%
	100%

Risk Management

The group has risk management procedures in place which address the five risk areas laid out in the Prudential Regulation Authority's Handbook. These are credit risk, market risk, liquidity risk, operational risk and insurance risk. The group has developed a business risk assessment which defines the risks and sets out the procedures that are in place to mitigate those risks. The business risk assessment is reviewed regularly by the board.

The group has taken steps, where appropriate and possible, to mitigate the risks with internal controls and procedures and management oversight. Where appropriate, the group monitors its risks through regular reporting of monetary and non-monetary risks via a series of key risk indicators. These are presented to the board and / or AIR committee four times per year. The group's principal risks and uncertainties are to insurance (including loss of financial strength and loss of business to competition); market (including loss or impairment of investments), currency, credit, liquidity and cashflow risks are further explained in note 4 of these financial statements. The group accepts levels of risk in different areas as set out in its Risk Appetite Statement.

The group addresses other risks namely political (including change to UK tax agreement) and climate change risk. The group considers how these could impact the financial risks and insurance risk exposures via its emerging risks log as well as via the climate change policy and plan. The group also considers fraud risks (including misappropriation of investment funds) and this is managed through the fraud risks register.

The group currently has a climate change policy and plan which aims to address relevant environmental, social and governance requirements. The group has put in place a policy to assist in managing the financial risks associated with the effects of climate change and to ensure that the group has adequate oversight and control of this area and understands how climate change relates to other risk groups. The financial risks emanating from climate change can impact other risk groups, specifically the strategy, insurance, credit and market risk areas. Financial risks from climate change arise through two primary channels, being physical and transition factors. In addition, liability can arise from third parties who have suffered loss or damage from physical or transition risk factors associated with climate change.

The objective of the climate change policy is to:
i. embed the consideration of the financial risks from climate change in the group's governance arrangements;
ii. incorporate the financial risks from climate change into existing financial risk management practice;
iii. use (long term) scenario analysis to inform strategy setting and risk assessment and identification; and
iv. develop an approach to disclosure on the financial risks from climate change.

The board is responsible for setting the climate change policy and ensuring that there are adequate processes in place to monitor and manage the financial risks from climate change within the parameters defined by the risk appetite. The risk function is responsible for assessing and monitoring the risk profile from climate change against the risk appetite and its tolerances. Stress and scenario testing relating to financial risks from climate change is being developed by the risk function and will be monitored regularly. There is a review at the board and Audit Investment and Risk committee of key risks, including risks associated with climate change. The ORSA considers the impact of climate change on the organisation. Risk identification and management is monitored throughout the year.

The group is comfortable that it has identified and taken into consideration its risk environment, as summarised above, and that it holds sufficient capital and reserves to cover its potential impact. The ITIC board approved its Own Risk and Solvency Assessment at the board meeting in March 2026 and this was submitted to the Prudential Regulation Authority shortly afterwards.

J D Woyda - Chair T J Irving - Chief Executive Officer 27 July 2026

INTERNATIONAL TRANSPORT INTERMEDIARIES CLUB LIMITED

Directors' Report

Summary of the financial year

The directors present their directors report on ITIC for the year ended 31 May 2026.

The results of ITIC are contained in the accounts on pages 12 to 34. The surplus before taxation for the year ended 31 May 2026 was US$6,795,000 (2025: surplus US$5,919,000). Additional explanation is included in the Strategic Report on page 4.

Directors

The names of the present directors, all of whom have held office during the year unless stated otherwise, are shown on page 3.

In the case of each of the persons who are directors at the time this report is approved, so far as the directors are aware, the following applies:

(a) There is no relevant audit information of which ITIC's auditors are unaware; and

(b) They have taken all the steps that they ought to have taken as a director in order to make themselves aware of any relevant audit information and to establish that ITIC's auditors are aware of that information.

Reinsurance relationship with Transport Intermediaries Mutual Insurance Association Limited ("TIMIA")

ITIC reinsures with TIMIA, registered in Bermuda, on a 90% quota share basis both its liabilities from 1 September 1992 and its liabilities assumed under the agreement to run-off TIMIA and the Chartered and International Shipbrokers P&I Club Limited ("CISBA").

Meetings of the Directors

The board met on three occasions in order to carry out its general and specific responsibilities under the Memorandum of Association and Rules of ITIC. The number of directors present at these meetings were as follows. Reduced attendance was requested for the meeting on 17th July 2025.

17th July 2025	8 out of 13 directors present
25th September 2025	13 out of 13 directors present
19th March 2026	13 out of 13 directors present

The directors considered the following topics at their meetings:

Audit Investment & Risk committee minutes
Actuarial function report
Board nominations
Business plan
Claims report including cases for consideration
Climate-related risks and their management
Closure of earlier policy years
Directors' and officers' liability insurance cover
Directors' fees
Doing business in the EEA
Finance report including forecasts and budgets
Financial crime and money laundering reports
Fit & proper declaration
Free reserve strategy review
General data protection regulation
Internal audit reports
Investment report, policy and mandate
Litigation against ITIC (*)
Modern Slavery Act 2015 declaration
Management agreement and fees
Material third party contracts
Nominations committee minutes
Operational resilience
Own Risk & Solvency Assessment
Policy reviews
Regulatory issues and letters
Reinsurance agreements and renewals
Renewal proposal
Report and financial statements, audit and regulatory returns
Risk assessments and risk appetite
Rotation of auditors
Rule updates and changes
Sales, marketing & communications report
Solvency and Financial Condition Report
Strategy review
Terms of reference for board and committees
Underwriting report

* Regarding litigation against ITIC, there are several cases in relation to claims where ITIC, in its capacity as the insurer of policyholders, has been brought into the claim as an additional defendant. This is considered to be a normal part of business and ITIC makes provisions for such cases, if required, as part of its assessment of outstanding claims reserves at the year end. Otherwise, there is no known current litigation against ITIC.

Directors' Report (continued)

Statement of Directors' Responsibilities

The directors are responsible for preparing the Directors' Report, the Group Strategic Report and the financial statements in accordance with applicable law and regulations.

Company law requires the directors to prepare financial statements for each financial year. Under that law the directors have elected to prepare the financial statements in accordance with United Kingdom Generally Accepted Accounting Practice (United Kingdom Standards and applicable law). Under company law the directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the state of affairs of the group and of the surplus or deficit of the group for that period. In preparing these financial statements, the directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and accounting estimates that are reasonable and prudent;
- state whether applicable UK Accounting Standards have been followed, subject to any material departures disclosed and explained in the financial statements;
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the group will continue in business.

The directors are responsible for keeping adequate accounting records that are sufficient to show and explain the group's transactions and disclose with reasonable accuracy at any time the financial position of the group and enable them to ensure that the financial statements comply with the Companies Act 2006. They are also responsible for safeguarding the assets of the group and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

The directors are responsible for the maintenance and integrity of the corporate and financial information included on the group's website. Legislation in the United Kingdom governing the preparation and dissemination of the financial statements may differ from legislation in other jurisdictions.

The following matters have been discussed within the Group Strategic Report:

i) Likely future developments in the business of the group; and

ii) The financial risk management objectives and policies of the group.

Sustainability

As part of its existing risk management framework, the group has in place a plan for dealing with the impact of climate change on its business operations and the associated risks. Ongoing assessment of the group's impact is in place and the plan will be refined during 2026.

The group falls under the scope of the Companies (Directors' Report) and Limited Liability Partnerships (Energy and Carbon Reporting) Regulations 2018 ("the Regulations") based on its turnover and balance sheet total. The directors have determined that the group is a low energy user, using less than 40,000 kwh per year. As noted earlier, the group's core management and business activities are outsourced to Thomas Miller. For these reasons the directors have not included information in relation to the group's energy and carbon usage.

Operating environment

The group continues to monitor the complex and volatile global geopolitical environment, notably ongoing conflicts in the Middle East and Eastern Europe, which directly affect global trade liquidity and supply chain resilience. Furthermore, evolving international sanctions, trade embargoes, and fragmented multi-jurisdictional regulations create an intricate compliance landscape for transport intermediaries. Alongside these legal risks, cyber threats pose systemic vulnerabilities to transport infrastructure. The Group actively monitors these risks in line with regulatory expectations.

The group continues to monitor these evolving risks closely. While the direct financial impact on the group is not currently expected to be significant, the group remains vigilant and prepared to take precautionary measures as necessary to safeguard its operations and policyholders.

Directors' indemnities

Directors' and officers' insurance cover has been established for all directors to provide appropriate cover for their reasonable actions on behalf of the group. This constitutes a qualifying third-party indemnity provision as defined by section 234 of the Companies Act 2006. The policy was in force during the financial year and remains in force for all current and past directors of the group.

Assessment of going concern

The group has retained reserves of US$65,675,000 (2025: US$59,995,000).

The group solvency ratio as at 30 November 2025, when last calculated, was 531% (Solvency II available own funds US$72,386,000) compared to the previous year end, 31 May 2025 where it was 498% based on the standard formula solvency capital requirement applicable to it. With strong underwriting and positive investment results, the solvency ratio as at 31 May 2026 is expected to be in line with or above the 30 November 2025 position.

The directors have considered the ongoing impacts of the conflicts noted above, as well as other economic factors such as inflation, energy prices, and cost of living crisis on the current and forecast position of the company. The directors consider it appropriate to adopt the going concern basis of accounting in the preparation of these financial statements and are not aware of any material uncertainties to the group's ability to continue to do so for at least 12 months from the date of authorisation of these financial statements. Accordingly, they continue to adopt the going concern basis in preparing the annual accounts.

Post balance sheet events

There were no post balance sheet events requiring disclosure.

Auditors

PKF have indicated their willingness to continue in office and a resolution will be proposed for their reappointment in accordance with Section 489 of the Companies Act 2006 at the Annual General Meeting to be held on 24 September 2026

INTERNATIONAL TRANSPORT INTERMEDIARIES CLUB LIMITED

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF INTERNATIONAL TRANSPORT INTERMEDIARIES CLUB LIMITED

Opinion

We have audited the financial statements of International Transport Intermediaries Club Limited (the 'parent company') and its subsidiary (the 'group') for the year ended 31 May 2026 which comprise the Consolidated Income and Expenditure Account, the Consolidated and Parent Company Balance Sheets, the Consolidated and Parent Company Statements of Changes in Reserves, the Consolidated Cash Flow Statement and notes to the financial statements, including significant accounting policies. The financial reporting framework that has been applied in their preparation is applicable law and United Kingdom Accounting Standards, including FRS 102 The financial reporting standard applicable in the UK and Republic of Ireland and FRS 103 Insurance contracts (United Kingdom Generally Accepted Accounting Practice).

In our opinion:

- the financial statements give a true and fair view of the state of the group's and of the parent company's affairs as at 31 May 2026 and of the group's surplus for the year then ended;
- have been properly prepared in accordance with United Kingdom Generally Accepted Accounting Practice;
- have been prepared in accordance with the requirements of the Companies Act 2006.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) (ISAs (UK)) and applicable law. Our responsibilities under those standards are further described in the Auditor's responsibilities for the audit of the financial statements section of our report. We are independent of the group and parent company in accordance with the ethical requirements that are relevant to our audit of the financial statements in the UK, including the FRC's Ethical Standard as applied to public interest entities, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Conclusions relating to going concern

In auditing the financial statements, we have concluded that the directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate. Our evaluation of the directors' assessment of the group's and parent company's ability to continue to adopt the going concern basis of accounting included:
• Inspecting and assessing management's forecasts including evaluating the key inputs and assumptions to the forecasts, which included considering their consistency with other available information;
• Evaluating the capital position of the group, the capital resources available and the feasibility of actions available to the directors over the next 12 months;
• Assessing the financial solvency under stressed conditions through inspection of the Own Risk and Solvency Assessment; and
• Assessing the appropriateness of the going concern disclosures in the financial statements

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the group's or parent company's ability to continue as a going concern for a period of at least twelve months from when the financial statements are authorised for issue.

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report.

Our application of materiality

We apply the concept of materiality both in planning and performing our audit, and in evaluating the effect of misstatements. Materiality is considered the magnitude by which misstatements, including omissions, either individually or in aggregate, could reasonably be expected to influence the economic decisions of users that are taken on the basis of the financial statements. Importantly, misstatements below this level will not necessarily be evaluated as immaterial as we also take account of the nature of identified misstatements, and the particular circumstances of their occurrence, when evaluating their effect on the financial statements. The application of these key considerations gives rise to the following level of materiality, the quantum and purpose of which is tabulated below.

	How we determined it	Key considerations and benchmarks	Quantum
Group financial statements	3% of the consolidated income and expenditure reserve (2025: 3%)	We have selected 3% of the consolidated income and expenditure account reserve as a measure of the available capital resources of the group as the group is a mutual insurance group and this is the most important metric for the users of the financial statements.	US$ 1,906,000 (2025: US$1,799,000)
Parent company financial statements	95% of the group performance materiality	The parent company benchmark is set at 95% of the Group's performance materiality, which aligns with our methodology of applying 90%–95% of the Group's performance materiality. This equates to 95% of US$1.524 million. As this is our third year auditing the entity, our improved understanding of its processes supports the use of a higher percentage.	US$1,447,000 (2025: $1,241,000)

We use a different level of materiality ('performance materiality') to determine the extent of our testing for the audit of the financial statements. We use performance materiality to reduce to an appropriately low level the probability that the aggregate of uncorrected and undetected misstatements exceeds financial statement materiality. Performance materiality is based on the audit materiality as adjusted for the judgments made as to the entity risk and our evaluation of the specific risk of each audit area having regard to the internal control environment. This was set at 80% of the financial statement materiality, amounting to $1,524,000 for the group financial statements (2025: $1,349,000) and $1,447,000 for the parent company financial statements (2024: $1,241,000).

We agreed with the Audit Committee that we would report to them all audit differences in excess of $95,000 (2025: $89,000) for the group financial statements and $95,000 (2025: $89,000) for the parent company financial statements as well as differences below that threshold that, in our view, warranted reporting on qualitative grounds

Our approach to the audit

Our audit approach was developed by obtaining an understanding of the group's and parent company's activities, the key subjective judgments made by the directors, for example in respect of the significant accounting estimates regarding the insurance technical provisions that involved making assumptions and considering future events that are inherently uncertain, and the overall control environment. Based on this understanding we assessed those aspects of the group's and parent company's transactions and balances which were most likely to give rise to a material misstatement and were most susceptible to irregularities including fraud or error. Specifically, we identified what we considered to be key audit matters and planned our audit approach accordingly.

Key audit matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period and include the most significant assessed risks of material misstatement (whether or not due to fraud) we identified, including those which had the greatest effect on: the overall audit strategy, the allocation of resources in the audit; and directing the efforts of the engagement team. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Key Audit Matter	How our scope addressed this matter
Valuation of claims outstanding and Reinsurer's share of claims outstanding	
As disclosed within notes 2(f), 3 and 7 – 'Claims including reinsurance recoveries', the gross claims outstanding at the year end was US$100,206,000 (2025: US$92,055,000), with the net balance being US$8,211,000 (2025: US$7,139,000). **The technical provisions are a key area of estimation within the financial statements, which requires the application of judgement and assumptions, and are therefore considered a key audit matter.** **We considered the adequacy of the technical provisions carried in the group and parent company's financial statements, including the reasonableness of the provisions for claims handling costs and related provisions. The group cedes 90% of the business through the quota share reinsurances with Transport Intermediaries Mutual Insurance Association Limited of Bermuda ("TIMIA"). Therefore, the reinsurers' share of the technical provisions is also significant to the financial statements.**	Our work in this area included: • Evaluating the design and implementation of controls in place over the valuation of the insurance contract provisions and reviewing the assumptions and underlying evidence supporting the year end valuations; • Reviewing the valuation reports prepared by the group's Actuarial Function considering whether, in our professional judgement, the methodology used in preparing those valuations is the most appropriate in the circumstances; • Testing the key controls around the claims reserving process including large loss reviews, identification of any disputes and considering relevant IT controls; • Liaising with the group's Actuarial Function to review their results as well as testing that the data used by them is appropriate; • Performing independent actuarial reprojections using the group's data to assess the reasonableness of the level of Incurred But Not Enough Reported (IBNER) recorded for the 31 May 2026 position, in conjunction with our own actuaries; • Assessing the risk margin to ensure the margin is consistently prudent with the reserving approach, through comparison to prior periods level of prudence; • Testing a sample of new claims being set up, as well as claim movements and payments to ensure by reference to documentation that the amounts recorded are for the correct amount and have been appropriately controlled and authorised; and • Reviewing the year-on-year claim development and assessing the reasons for any over or under reserving. For the valuation of the reinsurer's share of claims outstanding, our work included: • Assessing the key terms of the reinsurance contracts and ensuring reinsurance recoveries are calculated in line with the agreements in place; and • Testing the calculations used in identifying reinsurers' share of any claims including understanding the procedures underlying the process driving the reinsurance recoveries. Based on our procedures performed, we concluded that the valuation of claims outstanding and reinsurer's share of claims outstanding to be reasonable.

Other information

The other information comprises the information included in the annual report, other than the financial statements and our auditor's report thereon. The directors are responsible for the other information contained within the annual report. Our opinion on the group and parent company financial statements does not cover the other information and, except to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon. Our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the course of the audit, or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether this gives rise to a material misstatement in the financial statements themselves. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in this regard.

Opinions on other matters prescribed by the Companies Act 2006

In our opinion, based on the work undertaken in the course of the audit:

- the information given in the strategic report and the directors' report for the financial year for which the financial statements are prepared is consistent with the financial statements; and
- the strategic report and the directors' report have been prepared in accordance with applicable legal requirements.

Matters on which we are required to report by exception

In the light of the knowledge and understanding of the group and the parent company and their environment obtained in the course of the audit, we have not identified material misstatements in the strategic report or the directors' report.

We have nothing to report in respect of the following matters in relation to which the Companies Act 2006 requires us to report to you if, in our opinion:

- adequate accounting records have not been kept by the parent company, or returns adequate for our audit have not been received from branches not visited by us; or
- the parent company financial statements are not in agreement with the accounting records and returns; or
- certain disclosures of directors' remuneration specified by law are not made; or
- we have not received all the information and explanations we require for our audit.

REPORT OF THE INDEPENDENT AUDITORS (continued)

Responsibilities of directors

As explained more fully in the statement of directors' responsibilities, the directors are responsible for the preparation of the group and parent company financial statements and for being satisfied that they give a true and fair view, and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the group and parent company financial statements, the directors are responsible for assessing the group's and the parent company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the group or the parent company or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Irregularities, including fraud, are instances of non-compliance with laws and regulations. We design procedures in line with our responsibilities, outlined above, to detect material misstatements in respect of irregularities, including fraud. The extent to which our procedures are capable of detecting irregularities, including fraud is detailed below:

- We obtained an understanding of the group and parent company and the sector in which they operate to identify laws and regulations that could reasonably be expected to have a direct effect on the financial statements. We obtained our understanding in this regard through discussion with management and the application of our knowledge and experience of the sector in which the group and parent company operate in and obtaining and understanding of the group's policies and procedures regarding compliance with laws and regulations.
- We determined the principal laws and regulations relevant to the group and parent company in this regard to be those arising from the Companies Act 2006, Prudential Regulation Authority (PRA) and Financial Conduct Authority (FCA) regulations, FRS 102 and FRS 103 and UK taxation legislation, as well as the equivalent laws and regulations for the subsidiary domiciled in Cyprus.
- We designed our audit procedures to ensure the audit team considered whether there were any indications of non-compliance by the group and parent company with those laws and regulations. These procedures included, but were not limited to:
    - making enquiries of management;
    - reviewing Audit, Investment and Risk committee and Board minutes;
    - reviewing legal and regulatory correspondence; and
    - agreeing financial statement disclosures to underlying supporting documents and ensuring compliance with reporting requirements.
- We also instructed the component auditors to carry out these procedures at the subsidiary level.
- We also identified the risks of material misstatement of the financial statements due to fraud. We considered, in addition to the non-rebuttable presumption of a risk of fraud arising from management override of controls, other areas most susceptible to fraud, such as the key audit matters identified including the valuation of the insurance technical provisions. The key audit matters section of our report explains these matters in more detail and also describes the specific procedures we performed in response to the key audit matter.
- As in all of our audits, we addressed the risk of fraud arising from management override of controls by performing audit procedures which included, but were not limited to: the testing of journals; reviewing accounting estimates for evidence of bias; and evaluating the business rationale of any significant transactions that are unusual or outside the normal course of business.

Because of the inherent limitations of an audit, there is a risk that we will not detect all irregularities, including those leading to a material misstatement in the financial statements or non-compliance with regulation. This risk increases the more that compliance with a law or regulation is removed from the events and transactions reflected in the financial statements, as we will be less likely to become aware of instances of non-compliance. The risk is also greater regarding irregularities occurring due to fraud rather than error, as fraud involves intentional concealment, forgery, collusion, omission or misrepresentation.

A further description of our responsibilities for the audit of the financial statements is located on the Financial Reporting Council's website at: www.frc.org.uk/auditorsresponsibilities. This description forms part of our auditor's report.

Other matters which we are required to address

We were appointed by the Company on 27 October 2023 to audit the financial statements for the period ending 31 May 2024 and subsequent financial periods. Our total uninterrupted period of engagement is three years, covering the periods ending 31 May 2024 to 31 May 2026.

The non-audit services prohibited by the FRC's Ethical Standard were not provided to the group or the parent company and we remain independent of the group and the parent company in conducting our audit.

Our audit opinion is consistent with the additional report to the Audit Investment and Risk Committee.

Use of our report

This report is made solely to the company's members, as a body, in accordance with Chapter 3 of Part 16 of the Companies Act 2006. Our audit work has been undertaken so that we might state to the company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone, other than the company and the company's members as a body, for our audit work, for this report, or for the opinions we have formed.

INTERNATIONAL TRANSPORT INTERMEDIARIES CLUB LIMITED

NOTES TO THE FINANCIAL STATEMENTS

Note 1 Constitution

ITIC is incorporated in England and Wales under the Companies Act 2006 as a company limited by guarantee and not having a share capital. ITIC's company registration number is 2725312 and its registered address is 90 Fenchurch Street, London EC3M 4ST.

In the event of ITIC's liquidation the net assets of ITIC are to be distributed among the current members in proportion to the amounts of premium payable by them during the preceding three years.

Note 2 Accounting policies

(a) Statement of compliance and basis of preparation

These financial statements have been prepared in accordance with the Companies Act 2006, Schedule 3 to The Large and Medium-sized Companies and Groups (Accounts and Reports) Regulations 2008 and applicable accounting standards in the United Kingdom ("UK GAAP"). The financial statements are prepared in accordance with “FRS102: The financial reporting standard applicable in the UK and Republic of Ireland” and “FRS103: Insurance contracts”.

These financial statements which consolidate the financial statements of ITIC and its subsidiary undertaking have been prepared under the Companies Act 2006. ITIC and its subsidiary undertaking have applied uniform accounting policies and on consolidation all intra-group transactions, profits, and losses have been eliminated. In the parent company balance sheet, shares in the subsidiary undertaking are shown at cost less any provision for impairment.

The functional currency of ITIC is considered to be US dollars because that is the currency of the primary economic environment in which ITIC operates. This has been selected on the basis that most of ITIC’s claims and expenses are paid in US dollars, and ITIC’s main reinsurance contract with TIMIA is denominated in US dollars.

ITIC has taken exemption from presenting a parent profit and loss account under section 408 of Companies Act 2006. ITIC has also taken exemption from presenting a parent Statement of Cash Flows under section 1.12(b) of FRS 102.

The financial statements have been prepared on a going concern basis. The directors consider it appropriate to adopt the going concern basis of accounting in the preparation of these financial statements and are not aware of any material uncertainties to ITIC’s ability to continue to do so for at least 12 months from the date of authorisation of these financial statements.

The group has retained reserves of US$65,675,000 (2025: US$59,995,000). The unaudited solvency ratio as at 30 November 2025, when last calculated, was 531% (available own funds US$72,386,000) compared to the previous year end, 31 May 2025 where it was 498% based on the standard formula solvency capital requirement applicable to it. The solvency ratio as at 31 May 2026 is expected to be in line with the 30 November 2025 position. The directors have considered the impact of factors disclosed in the Group Strategic Report. The directors consider it appropriate to adopt the going concern basis of accounting in the preparation of these financial statements and are not aware of any material uncertainties to ITIC’s ability to continue to do so for at least 12 months from the date of authorisation of these financial statements. Accordingly, they continue to adopt the going concern basis in preparing the annual accounts.

(b) Policy year accounting

ITIC’s business is accounted for on an annual basis. Each policy year runs in line with ITIC's financial year. For reporting the policy year position to the members, calls and premiums together with reinsurance premiums are allocated to the policy years in which they incept. Claims and related reinsurance recoveries are allocated to the policy year in which the claim is first notified. General expenses and management fees are allocated to the current policy year. A policy year is usually closed during the policy year following the year of inception during which time members are liable for their rateable proportion of any deficiency resulting from an excess of claims and expenses over income. The board are empowered to return premium via a continuity credit if they believe that it is appropriate to do so. The policy year position is shown in the analysis of funds section within the strategic report.

The consolidated income and expenditure account for a year represents the aggregate of changes during the financial year on all policy years.

(c) Gross written premiums

Gross written premiums arise from annual and multi-year policies. All premiums are recognised on inception of the policy. Gross written premiums are the total receivable for contracts entered into during the accounting period together with any premium adjustments relating to prior periods. Continuity credits are discounts provided to renewing members against the renewed policy. All two year contracts have a break clause which allows ITIC or the insured to cancel the policy prior to the second year commencing. Any premium relating to the second year of a policy is recognised in the accounts, but policies bound prior to the end of the year but incepting after the start of the new year are excluded. All premiums and continuity credits are shown gross of commission payable to intermediaries and are exclusive of taxes and duties levied thereon. The continuity credit is a mechanism used to return surpluses on policy years to the long term members of ITIC, helping ITIC satisfy its mutual obligations.

Gross written premiums arise from direct insurance and from fronted reinsurance. Fronted reinsurance arises where policies are underwritten in the name of another entity which then wholly reinsures the risk into ITIC. This approach will be used when ITIC needs a facility to underwrite in certain countries where it is not permitted and admitted. The terms, policy wordings and accounting recognition for fronted reinsurance are the same as for the direct insurance written.

(d) Unearned premiums

Written premiums are recognised as earned income over the period of the policy on a time apportionment basis with the unearned portion recognised in the balance sheet. Similarly, continuity credit costs are recognised over the period of the policy on a time apportioned basis, as a discount to premiums.

(e) Deferred acquisition costs

Acquisition costs, comprising commission and other costs related to the acquisition of new insurance contracts, are deferred to the extent that they are attributable to premiums unearned at the balance sheet date.

Note 2 Accounting policies (continued)

(f) Claims

Claims are the legal costs and expenses of the members covered by ITIC. They include all claims notified during the year, whether paid, estimated by the management or where claims reserves have been created to cover future deterioration, together with current and future claims handling fees. Claims also include adjustments for claims outstanding from previous years.

Balance sheet

The claims provision, recognised as a part of technical provisions in the balance sheet, comprises:

i) Estimated claims as at the balance sheet date on notified claims outstanding in all policy years;

ii) Additional provision to allow for adverse developments on estimated claims including those claims where no estimate is currently thought to be required. This comprises a provision for claims incurred but not enough reserved ("IBNER") together with an explicit margin for uncertainty and adverse development;

iii) Provision for the managers' future claims handling costs; and

iv) Since ITIC insures on a claims made basis, there is no need to provide for incurred but not reported claims.

The risks associated with insurance contracts are complex and subject to a number of variables. ITIC uses several statistical and actuarial techniques based on past claims development experience. This includes indications such as average claims cost and ultimate claims numbers.

Significant delays are experienced in the settlement of certain insurance claims, the ultimate cost of which may vary from the original assessment. Adjustments to claims provisions established in previous years are reflected in the financial statements for the period in which the adjustments are made.

Income and expenditure account

The figure for claims incurred in the consolidated income and expenditure account comprises claims and costs paid during the year, the claims handling costs of the managers and the movement in the claims provision since the last balance sheet date.

(g) Reinsurance recoveries

The claims liabilities of ITIC are reinsured for claims costing above certain levels. In addition, claims within ITIC's retention are reinsured on a 90 per cent quota share basis. The figure credited to the consolidated income and expenditure account for reinsurance recoveries represents receipts and amounts due or estimated under these arrangements on claims already notified. The quota share reinsurance policy also provides for recovery of 100% of management and general expenses and the currency gains / losses.

(h) Outward reinsurance premiums

Outward reinsurance premiums are accounted for in the same accounting period as the premiums for the related direct or inward reinsurance business being reinsured.

(i) Financial instruments

ITIC has applied the requirements of FRS 102 sections 11 and 12 to the measurement, presentation and disclosure of its financial assets. Investments in short term deposit funds and the foreign exchange security deposit are designated in the balance sheet at fair value through profit or loss. Fair value is calculated using the bid price at the close of business on the balance sheet date. Those purchased in foreign currencies are translated into US dollar on the date of purchase. The fair value of foreign currency investments is translated at the rate of exchange ruling at the balance sheet date.

Financial assets are derecognised when the contractual rights to the cash flows from the asset expire, or when ITIC has transferred substantially all the risks and rewards of ownership. Financial liabilities are derecognised only once the liability has been extinguished through discharge, cancellation or expiry.

ITIC enters into basic financial instrument transactions that results in the recognition of financial assets and liabilities such as insurance debtors and creditors, these are initially measured at cost or amortised cost and are accessed at the end of each reporting period for objective evidence of impairment. If objective evidence of impairment is found a provision is recognised in the statement of income and expenditure.

(j) Other financial investments

Assets, including all investments of ITIC, are classified as fair value through profit and loss and are designated as such by management to minimise any measurement or recognition inconsistency with the associated liabilities.

Investments are included in the balance sheet at market value translated at year end rates of exchange. Fair values of investments traded in active markets are measured at bid price. Where there is no active market, fair value is measured by reference to other factors such as independent valuation reports. Derivatives held as investments of ITIC, are classified as fair value through profit and loss in line with the treatment of other investments.

A financial instrument is regarded as quoted in an active market if quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service, or regulatory agency, and those prices represent actual and regularly occurring market transactions at an arm's length basis. If the above criteria are not met, the market is regarded as being inactive.

The costs of investments denominated in currencies other than US dollars are translated into US dollars on the date of purchase. Any subsequent changes in value, whether arising from market value or exchange rate movements, are charged or credited to the consolidated income and expenditure account. The movement in unrealised investment gains and losses includes the reversal of previously recognised unrealised gains and losses on investments disposed of in the current period.

Net gains or losses arising from changes in fair value of financial assets at fair value through profit or loss are presented in the consolidated income and expenditure account within 'unrealised gains/(losses) on investments' in the period in which they arise.

(k) Investment returns

Investment returns comprise dividend income from equities, income on fixed interest securities and interest on deposits and on cash. As part of ITIC's quota share reinsurance arrangements with TIMIA, the total ITIC and TIMIA investment result is apportioned between the two companies on a 10:90 split.

Dividends are recognised as income on the date the relevant securities are marked ex-dividend. Other investment income is recognised on the accruals basis.

(l) Cash and cash equivalents

Cash and cash equivalents consist of: cash in hand, balances with banks and investments in money market instruments which are readily convertible, being those with original maturities of three months or less. Cash and cash equivalents in foreign currency are translated based on the relevant exchange rates at the reporting date.

(m) Foreign currencies

ITIC's functional and presentation currency is US dollars and the figures shown within the financial statements are rounded to the nearest thousand.

Transactions in foreign currencies have been translated into US dollars at the rate applicable for the month in which the transaction took place. At each reporting date, monetary assets and liabilities that are denominated on foreign currencies, are translated into US dollars at the rates of exchange ruling at the end of the reporting period.

All exchange gains and losses, whether realised or unrealised, are included in the foreign exchange gains and losses in the consolidated income and expenditure account.

(n) Taxation

Current tax is the amount of income tax payable in respect of the taxable profit for the year or prior years. The company is a mutual and is not taxed on its operating result or exchange gains / (losses) but only on its investment income. Tax is calculated in full on timing differences that result in an obligation at the balance sheet date to pay more tax or a right to pay less tax at a future date. The rates used in these calculations are those which are expected to apply when the timing differences crystallise, based on the current tax rates and law. Timing differences arise from the inclusion of items of income and expenditure in taxation computations in the periods different from those in which they are included in the financial statements. Deferred tax assets are recognised to the extent that it is regarded as probable that they will be recovered.

Note 3 Critical accounting estimates and judgements

ITIC makes estimates and assumptions that affect the reported amounts of assets and liabilities. Estimates and judgements are continually evaluated and based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. Actual results may differ from these estimates.

The following critical accounting estimates and judgements are made by ITIC:

The ultimate liability arising from claims made under insurance contracts

The estimation of the ultimate liability arising from claims made under insurance contracts is ITIC's most critical accounting estimate. Sensitivity to key assumptions is disclosed in Note 4. The carrying amount for the liability and any related reinsurance recovery is shown in the notes to the financial statements. There are several sources of uncertainty that need to be considered. Estimates are made for the expected ultimate cost of claims reported at the end of the reporting period and thus comprise of case estimates plus an additional provision for claims IBNER (see note 2f).

The main assumption underlying these techniques is that a Company’s past claims development experience can be used to project future claims development and hence ultimate claims costs. These methods extrapolate the development of paid and incurred losses, average costs per claim (including claims handling costs), and claim numbers based on the observed development of earlier years and expected loss ratios. Historical claims development is mainly analysed by accident years, but can also be further analysed by geographical area, as well as by significant business lines and claim types. Large claims are usually separately addressed, either by being reserved at the face value of loss adjuster estimates or separately projected in order to reflect their future development. In most cases, no explicit assumptions are made regarding future rates of claims inflation or loss ratios. Instead, the assumptions used are those implicit in the historical claims development data on which the projections are based.

The provision for claims handling reserve is subject to a degree of uncertainty. In calculating the estimated liability, the group uses a number of estimation techniques based upon how claims develop over time and how costs are allocated to claims. The method used and estimates made are reviewed regularly. Given the inherent uncertainty, the final outcome may differ materially from the amounts provided.

Note 4 Management of risks

ITIC is governed by the board of directors which drives decision making within ITIC from board level through to operational decision making within the managers. The board considers the type and scale of risk that ITIC is prepared to accept in its ordinary course of activity and this is used to develop strategy, risk appetite and decision making.

ITIC is focused on the identification and management of potential risks. This covers all aspects of risk management including that to which ITIC is exposed through its core activity as a provider of insurance services plus the broader range of risks. ITIC considers its key risks as the following:

- Insurance risk - incorporating underwriting and reserving risk;
- Market risk - incorporating investment risk, and interest rate risk;
- Currency risk - the risk of adverse currency exchange movements;
- Credit risk - the risk that a counterparty is unable to pay amounts in full when due; and
- Liquidity and cash flow risk - the risk that cash may not be available to pay obligations as they fall due.

Financial risk management objective

ITIC is exposed to financial risk through its financial investments, reinsurance assets and liabilities to policy holders. In particular, the key financial risk is that the proceeds from financial investments are not sufficient to fund the obligations arising from policies as they fall due. The most important components of this financial risk are market risk or investment risk (comprised of interest rate risk, equity price risk and currency risk) together with credit risk and liquidity risk.

ITIC manages these risks using a risk governance structure incorporating the managers' risk committee and the Audit Investment & Risk Committee. Further details can be found in the Group Strategic Report on pages 4 to 6.

The board is responsible, advised by ITIC's Chair working with the Audit Investment & Risk Committee, for setting investment policy and the appropriate level of market or investment risk. This is set with reference to the overall risks faced by ITIC which are analysed as part of the ORSA process.

The processes used to manage risks within ITIC are unchanged from the previous period.

(a) Insurance risk

ITIC's exposure to insurance risk is initiated by the underwriting process and incorporates the possibility that an insured event occurs, leading to a claim on ITIC from a member. The risk is managed by the underwriting process, acquisition of the reinsurance cover, and the management of claims costs.

ITIC's main insurance risks can arise from:
- Inappropriate underwriting of risks;
- Prohibitive cost / unavailability of reinsurance;
- Failure to react to major increase in claims;
- Impact of new legislation on risks written; and
- Over reliance on significant premium payers.

The objective of ITIC's insurance risk management process is to establish effective underwriting, reinsurance and reserving strategies which are agreed and monitored by ITIC's board in accordance with its risk appetite statement.

ITIC establishes provisions for unpaid claims and related expenses to cover its expected liability. These provisions are established through the application of actuarial techniques and assumptions. In order to minimise the risk of understating these provisions, the assumptions made and actuarial techniques employed are reviewed in detail by management.

ITIC considers that the liability for insurance claims recognised in the balance sheet is adequate. However, actual experience will differ from the expected outcome and this is monitored in ITIC's Key Risk Indicators which are reported to the board and Audit Investment & Risk Committee at their meetings.

The results of sensitivity testing are set out below, showing the impact on the surplus before tax, gross and net of reinsurance. The impact of the change in a single factor is shown, with the other assumptions unchanged. The sensitivity was chosen because the loss ratio is a key performance indicator of the business. The analysis assumes that a change in loss ratio (claims including management fee element as a percentage of earned premium less continuity credit less acquisition costs) is driven by the change in claims incurred. The 5% assumption for sensitivity is chosen to demonstrate a typical level of swing that might be experienced.

	2026	2025
	US$	US$
Increase in loss ratio (see definition below) by 5 percentage points from 49% to 54% (2025 - 46% to 51%)	000s	000s
Based on gross premium net of acquisition costs and excess of loss reinsurance costs	(3,072)	(2,927)
Based on gross premium net of acquisition costs and all reinsurances	(307)	(293)

A 5 per cent decrease in loss ratios would have an equal and opposite effect.

Loss ratio is calculated as claims incurred net of excess of loss recoveries (including management fee element) as a percentage of gross earned premium less acquisition costs (including management fee element) less excess of loss reinsurance costs. These figures are shown in the strategic report.

Note 4 Management of risks (continued)

Underwriting process

ITIC has an underwriting policy which is approved by the board annually which manages the underwriting risk. The policy sets out the processes by which the risk is managed.

ITIC operates a risk rating system which provides underwriting parameters for assessing the premium to be charged. All policies are signed off by the underwriting director or an individual delegated by the underwriting director.

Reinsurance

ITIC's reinsurance programme is designed to manage risk to an acceptable level to optimise ITIC's capital position. The programme comprises excess of loss reinsurance cover to protect against individual large losses, and a 90% quota share arrangement with TIMIA.

Reserving process

ITIC establishes provisions for unpaid reported claims and relating expenses to cover its expected liability. These provisions are established through the application of actuarial techniques and assumptions as set out in note 3 of the financial statements as directed and reviewed by the Audit Investment & Risk Committee. In order to minimise the risk of understating these provisions, the assumptions made and actuarial techniques employed are reviewed in detail by senior members of the managers and ITIC's Audit Investment & Risk Committee.

ITIC considers that the liability for insurance claims recognised in the balance sheet is adequate. However, actual experience will differ from the expected result.

(b) Market - interest rate risk

ITIC's investment policy is set to ensure that the duration of the investment portfolio is appropriately matched to the duration of the policyholders' liabilities. Interest rate risk is monitored by comparing the mean duration of the investment portfolio and that of the policyholders' liabilities. The mean duration is an indicator of the sensitivity of the assets and liabilities to changes in the current interest rates.

The sensitivity analysis for interest rate risk illustrates how the fair value of a financial instrument will fluctuate because of changes in market interest rates at the reporting date. ITIC's fixed income portfolio currently has a modified duration of about 3.7 years. This means that in the event of a parallel shift of the yield curve up by 100 basis points, the portfolio's value will decline, resulting in approximately 3.7% loss on the fixed income portfolio.

For ITIC, this would result in a decrease in investment values of approximately US$1,047,000 (2025: US$1,392,000) if all other assumptions remain unchanged

A decrease of 100 basis points in bond yields would result in the opposite effect (i.e. increase in investment values of approximately equal magnitude) assuming all other assumptions remain unchanged.

Note 4 **Management of risks (continued)**

(c) Currency risk

ITIC is exposed to currency risk in respect of assets under policies of insurance denominated in currencies other than US dollars. The most significant currency risk to which ITIC is exposed to are pounds sterling and the Euro.

The following table shows ITIC's net retained reserves by currency. ITIC seeks to mitigate the risk by matching the estimated foreign currency denominated liabilities within the financial investments denominated in the same currency. It should be noted that the table presented below shows balances arising from insurance and reinsurance contracts, the balance with quota share reinsurer and other debtors and creditors.

	US$	GBP	EUR	Other	Total
	US$	US$	US$	US$	US$
2026	000s	000s	000s	000s	000s
Debt securities, UCITS and cash	44,111	5,692	8,386	321	58,510
Forward Contracts	300	(301)	-	-	(1)

Debtors arising from direct insurance operations	17,640	4,174	6,401	1,699	29,914
Debtors arising from reinsurance operations	2,698	-	-	-	2,698
Other debtors & prepayments	4	138	534	-	676
Gross claims provisions	(78,160)	(8,032)	(12,705)	(1,309)	(100,206)
Deferred acquisition costs	4,327	1,110	1,862	745	8,044
Creditors arising out of direct insurance operations - amounts due to members / brokers	(52)	(3)	8	-	(47)
Provision for unearned premiums	(27,831)	(6,858)	(9,162)	(3,208)	(47,059)
Creditors arising out of reinsurance operations	(14,636)	4,674	2,867	(633)	(7,728)
Other creditors including taxation and social security	(3,250)	-	22	-	(3,228)
Accruals	(4,771)	(2,822)	(1,674)	(980)	(10,247)
Total retained reserves	57,424	3,944	4,785	(478)	65,675

	US$	GBP	EUR	Other	Total
	US$	US$	US$	US$	US$
2025	000s	000s	000s	000s	000s
Debt securities, UCITS and cash	51,456	2,156	9,847	789	64,248
Forward Contracts	(5,656)	(301)	5,948	-	(9)
Reinsurers share of unearned premium provision	23,002	6,185	7,668	3,058	39,913
Reinsurers share of gross claims provisions	84,916	-	-	-	84,916
Debtors arising from direct insurance operations	12,239	3,571	4,401	1,902	22,113
Debtors arising from reinsurance operations	312	-	-	-	312
Other debtors & prepayments	(5)	28	324	-	347
Gross claims provisions	(70,278)	(11,250)	(9,161)	(1,366)	(92,055)
Deferred acquisition costs	3,866	925	1,446	706	6,943
Creditors arising out of direct insurance operations - amounts due to members / brokers	(216)	13	118	(3)	(88)
Provision for unearned premiums	(25,559)	(6,872)	(8,520)	(3,397)	(44,348)
Creditors arising out of reinsurance operations	(20,831)	5,960	3,310	(324)	(11,885)
Other creditors including taxation and social security	(1,968)	-	(18)	-	(1,986)
Accruals	(5,205)	(1,273)	(1,051)	(897)	(8,426)
Total retained reserves	46,073	(858)	14,312	468	59,995

The change in exchange rates of sterling and the euro is the most likely cause of significant exchange gains or losses, hence these currencies are used for the sensitivity analysis. A 5 per cent strengthening of the following currencies against the US dollar would be estimated to have increased / (decreased) the surplus after tax and reserves at the year-end by the following amounts:

	Effect on Surplus after tax
As at 31 May 2026	
Sterling	197
Euro	239
As at 31 May 2025	
Sterling	(43)
Euro	716

A 5 per cent weakening of these currencies against the US dollar would have an equal and opposite effect.

Note 4 **Management of risks (continued)**

(d) Credit risk

Credit risk is the risk a counterparty will be unable to pay the amounts in full when due. The main areas where ITIC is exposed to credit risk are:

- Reinsurers' share of insurance liabilities;
- Amounts due from reinsurers in respect of claims already paid;
- Amounts due from policyholders;
- Amounts due from insurance intermediaries;
- Amounts due from bond issuers;
- Cash at banks and deposits with credit institutions; and
- Counterparty risk with respect to derivative transactions.

Reinsurance is used to manage insurance risk. This does not, however, discharge ITIC's liability as primary insurer. If a reinsurer fails to pay a claim, ITIC remains liable for the payment to the policyholder.

Credit risk on reinsurance balances is mitigated by assessing the creditworthiness of the reinsurer before it is used and strict criteria are applied (including rating the financial strength of the reinsurer) before a reinsurer is approved. All excess of loss reinsurance contracts are subject to an A- or above rating. ITIC and ITIC Europe's quota share reinsurance agreements are placed with TIMIA. TIMIA is unrated but ITIC holds a fixed charge of US$46,551,000, and ITIC Europe holds a fixed charge of US$27,357,000 both secured on the TIMIA investments portfolio. This fixed charge security, together with TIMIA's net asset value of US$255,019,000 as at 31 May 2026, provides satisfactory mitigation comfort over the credit risk exposure arising from the remaining portion of the claims recovery quota share which is unsecured.

Debtors arising out of direct insurance operations comprise premium owed by the members of ITIC. Credit risk relating to this risk is managed through take on procedures for the assured. Furthermore, if the assured does not pay, then cover may be cancelled back to inception.

Counterparty limits based on the credit ratings are also in place in relation to the amounts due from bond issuers and cash and bank deposits.

The following table provides information regarding aggregated credit risk exposure for financial assets with external credit ratings as at 31 May 2026. The credit rating bands are provided by independent ratings agencies:

2026	AAA US$ 000s	AA US$ 000s	A US$ 000s	BBB+ or less or not rated US$ 000s	Total US$ 000s
Fixed interest - Government	5,897	25,668	-	-	31,565
Fixed interest - Corporate	-	7,899	-	-	7,899
Forward Contracts	-	(1)	-	-	(1)
UCITS	4,127	-	-	-	4,127
Claims recoveries excess of loss reinsurance	-	-	10,600	-	10,600
Claims recoveries quota share reinsurance	-	-	-	81,395	81,395
Cash	-	-	14,633	-	14,633
Arising from insurance and reinsurance operations	-	-	-	32,612	32,612
Total	10,024	33,566	25,233	114,007	182,830

2025	AAA US$ 000s	AA US$ 000s	A US$ 000s	BBB+ or less or not rated US$ 000s	Total US$ 000s
Fixed interest - Government	4,993	29,168	-	-	34,161
Fixed interest - Corporate	-	9,582	-	-	9,582
Forward Contracts	-	(9)	-	-	(9)
UCITS	8,457	-	-	-	8,457
Claims recoveries excess of loss reinsurance	-	-	13,664	-	13,664
Claims recoveries quota share reinsurance	-	-	-	71,252	71,252
Cash	-	-	11,552	-	11,552
Arising from insurance and reinsurance operations	-	-	-	22,425	22,425
Total	13,450	38,741	25,216	93,677	171,084

ITIC's policy is to make a full provision against all reinsurance debts with an age in excess of two years and fifty per cent for reinsurance debts between one and two years old. ITIC issues notices of cancellation against premium debts greater than 60 days overdue unless there is good reason not to do so. In the event of cancellation the policy is cancelled back to inception.

Claims recovery balances in respect of quota share reinsurance include US$46,551,000 (2025 - US$44,747,000) covered by a fixed charge on a portfolio of ITIC assets held by TIMIA. In addition, a quota share reinsurance agreement in respect of ITIC Europe includes US$27,357,000 (2025 - US$26,393,000) covered by a fixed charge on a portfolio of ITIC Europe assets held by TIMIA.

After assessing all other financial assets at the end of the year, no objective evidence was found to suggest that any were impaired (2025: no impairments).

NOTES TO THE FINANCIAL STATEMENTS (continued)

Note 4 Management of risks (continued)

(e) Liquidity and cash flow risk

Liquidity and cash flow risk is the risk that cash may not be available at a reasonable cost to pay obligations as they fall due. ITIC maintains holdings in short term deposits to ensure there are sufficient funds available to cover anticipated liabilities and unexpected levels of demand. As at 31 May 2026 ITIC's short term deposits amounted to US$14,633,000 (2025: US$11,552,000). The tables below provide a maturity analysis of ITIC's financial instruments which may be varied at the discretion of the investment manager. The assets in the below tables are not impaired due to the fact that their full value are deemed to be recoverable.

2026	Less than 6 months or on demand US$ 000s	6 months - 1 year US$ 000s	1 - 2 years US$ 000s	2-5 years US$ 000s	> 5 years US$ 000s	Carrying value in the balance sheet US$ 000s

Total	28,862	12,684	(214)	19,918	3,884	65,134

(f) Capital management

ITIC maintains capital, comprising of policyholders' funds (surplus and reserves), consistent with ITIC's risk profile and the regulatory requirements of the business. As at 31 May 2026, the total free reserves available amounted to US$65,675,000 (2025: US$59,995,000). ITIC's strategy is to maintain sufficient capital to exceed the Standard Formula Solvency II Capital Requirements ("SF SCR") such that there is less than a 1 in 200 chance of breaching this requirement over the subsequent year. The solvency ratio as at 30 November 2025, when last calculated, was 531% (available own funds US$72,386,000) compared to the previous year end, 31 May 2025 where it was 498% based on the standard formula solvency capital requirement applicable to it. The solvency ratio as at 31 May 2026 is expected to be in line with the 30 November 2025 position. The solvency position is reviewed by the board on an ongoing basis with a view to maintaining a level of capital sufficient to cover significant risks and regulatory requirements and these have not been breached in the current year.

Note 5 Premium including movement on unearned premium

ITIC writes only one class of business. Premium is written in one or two year policies and the renewal of these policies is uneven. As a result, more premium is written in years ending in an even number. The business review clearly summarises the premium on an earned basis and this shows a more even split between consecutive years. ITIC continues underwriting through its subsidiary undertaking ITIC Europe in Cyprus to write business in other EU countries. ITIC Europe is, like ITIC, reinsured via a 90% quota share agreement with TIMIA.

	2026 US$ 000s	2025 US$ 000s
Gross premium written:		
Direct insurance - members located in UK	25,561	18,235
Direct insurance - members located outside EU	40,146	20,808
Direct insurance - members located in EU States	30,088	27,432
Reinsurance - members located in EU States	-	-
	95,795	**66,475**

Note 5 **Premium including movement on unearned premium (continued)**

Unearned premium is that part of gross premiums written, net of continuity credits, which is estimated to be earned in the following or subsequent financial years. the consolidated income and expenditure account shows the change in the provision for unearned premium and comprises the following:

Group	2026 Premium US$ 000s	2026 Continuity credit US$ 000s	2026 Total US$ 000s	2025 Premium US$ 000s	2025 Continuity credit US$ 000s	2025 Total US$ 000s
Written in year	**95,795**	**(41,593)**	**54,202**	**66,475**	**(20,417)**	**46,058**
Unearned provision brought forward	60,447	(16,099)	44,348	69,704	(14,249)	55,455
Foreign exchange differences	(478)	67	(411)	695	(202)	493
Less: Unearned provision carried forward	(76,406)	29,347	**(47,059)**	(60,447)	16,099	**(44,348)**
Movement in year	(16,437)	13,315	**(3,122)**	9,952	1,648	**11,600**
Earned / expensed in year	**79,358**	**(28,278)**	51,080	**76,427**	**(18,769)**	57,658

Note 6 **Outward reinsurance premiums**

Outward reinsurance premiums comprise quota share premium, continuity credit and acquisition costs between ITIC and TIMIA. In addition, there is the excess of loss insurance cost less the quota share in relation to this. Further there is a quota share ceding commission between ITIC and TIMIA.

Group	2026 Outward quota share reinsurance on premium US$ 000s	2026 Outward quota share reinsurance continuity credit US$ 000s	2026 Other reinsurance US$ 000s	2026 Total US$ 000s	2025 Outward quota share reinsurance on premium US$ 000s	2025 Outward quota share reinsurance continuity credit US$ 000s	2025 Other reinsurance US$ 000s	2025 Total US$ 000s
Written in year	(86,216)	37,434	-	(48,782)	(59,828)	18,375	-	(41,453)

The ceding commission from TIMIA is calculated in accordance with the reinsurance contract with TIMIA. The reinsurance payable to TIMIA is calculated after adjustment of operating costs and exchange movements incurred by the group. The quota share on acquisition costs refers to 90% of the acquisition costs incurred by the group on its premium income and transferred on to TIMIA, again this is part of the reinsurance contract with TIMIA.

The reinsurers' share represents that part of the claims provision which is recoverable from reinsurers and is based on estimated recoveries against estimated claims and cost provisions.

Development claims tables

The development of insurance liabilities provides a measure of ITIC's ability to estimate the ultimate value of claims. The top half of each table below illustrates ITIC's estimate of total claims outstanding for each policy year has changed at successive year ends. The bottom half of the table reconciles the cumulative claims to the amount shown in the balance sheet.

Consolidated Gross insurance claims liability before excess of loss or quota share reinsurance recoveries:

Reinsurers' share - quota share reinsurer	(59,927)
Claims outstanding - net amount	5,955

The nature of the business makes it very difficult to predict with certainty the likely outcome of any particular case and the ultimate cost of notified claims. The estimates for known outstanding claims are based on the best estimates and judgement of the managers of the final cost of individual cases. These estimates are as reliable as possible given the details of the cases and taking into account all the current information. However, the final outcome of individual cases may prove to be significantly different to the estimates made at the balance sheet date. The estimates are reviewed regularly. The gross provision for claims includes allowances for adverse development and the managers' future claims handling costs.

A reasonable allowance has been made for adverse claims development in the future. The allowance is assessed by an actuary using standard actuarial techniques. This methodology projects the claims statistics forward based on the historical pattern of claims experience of ITIC in the past.

The movement in the gross provision for claims is the difference between the provision for outstanding claims on all financial years at the beginning of the year and the equivalent provision at the end of the year, after deduction of all claims paid during the financial year and addition of the allowance for new claims notified in the 2025/26 policy year.

Note 8 Net operating expenses

			(4,283)		(2,898)
			(26,044)		(22,862)

NOTES TO THE FINANCIAL STATEMENTS (continued)

Note 9 Management fees

The fee paid to the managers relates to the cost of providing offices, staff and administration in London. The basis of this remuneration is fixed by the directors and is subject to periodic review. It was agreed by the board in March 2025 for the three years commencing 1st June 2025.

The fees for the year to 31 May 2026 are based on five elements:

i) The cost based element which covers the managers' costs in sterling. The investment management core fee is payable separately at 0.32% of assets under management which is charged quarterly.

ii) The operating incentive fee which is charged at 3.05% of premium earned net of brokerage and commissions;

iii) The investment incentive fee which is calculated at 40% of any surplus subject to a maximum of 0.05% of average funds under management. Nothing is paid in the event that the investment return is negative;

iv) The investment incentive fee which is calculated at 40% of any outperformance of the investment benchmark return subject to a maximum of 0.2% of average funds under management; and

v) A further combined ratio incentive fee which pays US$60,000 per 1% point of pre-continuity credit combined ratio between 100% and 90% and US$115,000 per 1% point of pre-continuity credit combined ratio below 90% subject to a maximum payment of US$1.3m in year 1, US$1.35m year 2 and US$1.4m year 3. In the event that the combined ratio is over 100% US$115,000 per 1% point of pre-continuity credit combined ratio is paid to ITIC. The maximum payment by TM (in the event the combined ratio exceeds 100%) to be US$780,000 in year 1, US$810,000 year 2 and US$840,000 year 3.

The management fee cost is allocated in the technical account between management fee, acquisition costs and claims handling fees:

Group	2026 US$ 000s	2025 US$ 000s
Management fee	(9,115)	(7,597)
Acquisition costs (see Note 10)	(3,376)	(2,836)
Claims handling fees (see Note 7)	(3,151)	(2,647)
	(15,642)	(13,080)

Allocation of acquisition costs from management fee	(3,376)			(2,836)		
Acquisition costs expensed after allocation of management fee	**(12,646)**			**(12,367)**		

Acquisition costs associated with the quota share arrangement are shown in note 6. The unexpensed provision for outward quota share reinsurance is shown in note 22.

Note 11 Directors' fees

The member non-executive directors are paid an annual fee and a fee for each meeting attended, as follows, as authorised under the bye-laws. Fees were increased from 1st June 2023 and a further increase was agreed from 1st June 2025. The fees for the non-member non-executive directors are individually negotiated. The executive directors are not paid any directors' fees.

	2026 Annual fee £	2026 Attendance fee £	2025 Annual fee £	2025 Attendance fee £
Chair of main ITIC board and Audit Investment & Risk Committee	20,300	5,700	19,700	5,500
Chair of Nominations Committee	10,800	5,700	10,500	5,500
Directors	5,700	5,700	5,500	5,500

No loans have been made to the directors and none are contemplated.

	2026 US$ 000s	2025 US$ 000s
Directors' fees (there were no pension contributions)	(612)	(479)
Directors' fees in respect of the highest paid director	(79)	(61)

NOTES TO THE FINANCIAL STATEMENTS (continued)

Note 12 General expenses

Group	2026 US$ 000s	2025 US$ 000s

Forward contracts	(1)	(9)	(1)	(9)
	32,457	39,531	32,014	38,724

All holdings in fixed income securities are in securities traded on recognised exchanges and are financial instruments measured at fair value through profit and loss. "Undertakings for collective investment in transferable securities" ("UCITS") are funds held for the short term.

For financial instruments measured at fair value, for each class of derivatives, the extent and nature of the instruments, including significant terms and conditions that may affect the amount, timing and certainty of future cash flows.

Fair value estimations

In accordance with section 34 of FRS102, as a financial institution, ITIC applies these requirements for financial instruments held at fair value in the balance sheet, and discloses the fair value measurements by the level of the following fair value hierarchy:

Level 1 - Quoted prices (unadjusted) in active markets for identical assets and liabilities;

Level 2 - Inputs other than quoted prices included within Level 1 that are observable for the assets or liabilities, either directly (that is, prices) or indirectly (that is, derived from prices); and
Level 3 - Inputs for the assets or liability that are not based on observable market data (that is, unobservable inputs).

The tables below presents ITIC's assets and liabilities measured at fair value by the level of the fair value hierarchy:

Consolidated assets and liabilities measured at fair value by the level of fair value hierarchy

As at 31 May 2026	Level 1 US$ 000s	Level 2 US$ 000s	Level 3 US$ 000s	Total US$ 000s
Assets and financial liabilities				
Fixed Interest - Government	31,565	-	-	31,565

Note 23 Related party transactions

ITIC has no share capital and is controlled by the members who are also the insured. Subsequently, all insurance transactions are deemed to be between related parties and these are represented in these financial statements. These are the only transactions between ITIC and its members.

All the directors are current representatives of member companies (unless stated otherwise on page 3) and, other than the member interests of their companies, the directors have no financial interests in ITIC.

ITIC reinsures with TIMIA of Bermuda on a 90% quota share basis both its liabilities from 1 September 1992 and its liabilities assumed under the agreement to run-off Transport Intermediaries Mutual Insurance Association Limited and the Chartered and International Shipbrokers P&I Club Limited ("CISBA").

At the year end ITIC have an amount owing to TIMIA of US$7,072,000 (2025: US$11,199,000), see note 20.

International Transport Intermediaries Management ("ITIM") provide key management personnel for ITIC and the management fee has been disclosed in Note 9. ITIM is a subsidiary of Thomas Miller Holdings Limited.

At the year end ITIC have an amount owing to ITIM of US$2,152,000 (2025: US$1,326,000 - see note 21).

Note 24 Movement in cash, portfolio investments and financing

Group	At 1 June 2025 US$ 000s	Movement US$ 000s	Change in market value US$ 000s	At 31 May 2026 US$ 000s

Note 25 **Investment in Subsidiaries**

Name of subsidiary	Country of Incorporation	Class of Shares held	Principal activity	Proportion of shares and voting rights
International Transport Insurance Intermediaries Company (Europe) Ltd ("ITIC Europe")	Republic of Cyprus	Ordinary	Insurance	100%
International Transport Intermediaries Club Advisory & Loss Prevention Pte. Ltd. ("ITIC A&LP")	Republic of Singapore	Ordinary	Loss prevention and consultancy services	100%

ITIC Europe's registered office is at Safe Bulkers Shipping Center, 2nd Floor, 2 Pavlou Nirvana & Ag. Fylaxeos Street, Limassol, Cyprus. The net asset value of the investment is US$11,260,000 at the balance sheet date (2025: US$10,743,000). The subsidiary cedes 90% of its risk to TIMIA via a reinsurance agreement.

During the year, ITIC Europe ceded US$7,744,000 (2025: US$6,516,000) gross reinsurance premium to TIMIA net of ceding commission. A liability of US$7,517,000 (2025: US$9,471,000) due to TIMIA is included in the subsidiary company balance sheet within creditors arising out of reinsurance operations.

ITIC A&LP's registered office is at 9 Straits View, #06-07, Marina One West Tower, 018937, Singapore. As of 31 May 2026, ITIC A&LP is dormant.

Note 26 **Post balance sheet events**

ITIC is managed by International Transport Intermediaries Management Company Ltd (“ITIM”) which is part of the Thomas Miller Holdings group (“Thomas Miller”).

In late 2025, The United Kingdom Mutual Steam Ship Assurance Association Limited (“UK P&I”) and Through Transport Mutual Insurance Association Limited (“TT Club”), two clubs also managed by Thomas Miller, announced their intentions to combine. To date and in accordance with press releases, the two clubs have made good progress in respect of their combination. Concurrently, UK P&I and TT Club have together submitted a non-binding proposal for the acquisition of the entirety of the share capital Thomas Miller not already owned by UK P&I Club. In response to these developments, ITIC is in the process of considering its position.

On 2 April 2026, International Transport Intermediaries Club Advisory & Loss Prevention Pte. Ltd was incorporated in Singapore with a share capital of US$1.00. It is the intention that this share is purchased by ITIC although this has not happened at the date of these accounts. The company has not commenced trading but is expected to operate as a management company.

There were no other post balance sheet events requiring disclosure.

As noted in the directors’ report, it continues to be appropriate to prepare ITIC’s financial statements on a going concern basis.
